

## NoiseOut™ Acoustic Wall Core

NoiseOut™ acoustic wallpaper helps eliminate noisy reverberation in your home or commercial space. Once installed, the appearance is just like a standard wallpapered wall. Unlike a normal wall, the core absorbing material behind the wallpaper will create a more enjoyable acoustic experience.

### Applications:

- Home Office
- Home Theaters
- Kitchen
- Bedrooms
- Restaurants
- Classrooms

### Installation:

Tape and spackle the core material just as you would any sheetrock wall. Sand and refinish as necessary to achieve a smooth surface that will accept the wall paper or other finish, such as plaster. When plaster is used, it cannot be painted. Paint will create the potential of cracking.

### General Description:

Thickness:	5/8" or 1 1/8"
Max height:	
Max width:	
Fire Rating:	Class A fire rating per ASTM E-84

### N.O. Units:

5/8":	4 Units/linear foot
1-1/8":	6 Units/linear foot
